

# APC FLAKE SYSTEM

## Experience The Difference

### PROVIDING A LONG TERM FLOORING SOLUTION

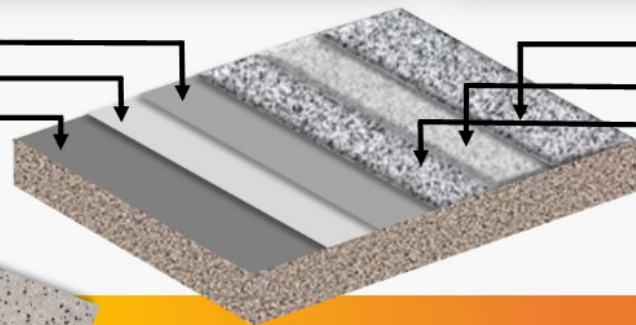

APC Flake systems are decorative, durable, hygienic and easy to maintain. Available to suit both interiors and exteriors, flake coatings are an ideal solution for residential and commercial applications where a lasting but decorative solution is required. APC Flake Systems have now become a desirable and modern flooring alternative to the carpet and tiles traditionally found in homes.

The finish of APC's Flake can be altered to result in a slip resistant surface for around pools and outdoor areas to a high gloss, glass like finish to transform the interior of any space.
